

Applications

Building automation

Factory automation

Household control system

Industrial control system

· Electro-mechanical apparatus

### Features

- Ultra slim design with 70mm(4SU) width
- · Universal input 85~264VAC(277VAC operational)
- No load power consumption<0.3W</li>
- Isolation class II
- · Pass LPS (Limited power source) for Blank type
- · DC output voltage adjustable
- · Protections : Short circuit / Overload / Over voltage
- Cooling by free air convection (working temperature:-30~+70°C)
- DIN rail TS-35/7.5 or 15 mountable
- · LED indicator for power on
- · 3 years warranty

### Description

HDR-100 is one economical ultra slim 100W DIN rail power supply series, adapt to be installed on TS-35/7.5 or TS-35/15 mounting rails. The body is designed 70mm(4SU) in width, which allows space saving inside the cabinets. The entire series adopts the full range AC input from 85VAC to 264VAC(277VAC operational) and conforms to EN61000-3-2, the norm the European Union regulates for harmonic current. HDR-100 is designed with plastic housing that it can effectively prevent user from electric hazards. With working efficiency up to 90%, the entire series can operate at the ambient temperature between -30°C and 70°C under air convection. It is equipped with constant current mode for over-load protection, fitting various inductive or capacitive applications. The complete protection functions and relevant certificates for home automations and industrial control apparatus (IEC60950-1,UL508, UL60950-1, EN61558-2-16) make HDR-100 a very competitive power supply solution for household and industrial applications.

Туре	Description	Note
Blank	92W max, Pass LPS with a narrower output adjustable range	In stock
Ν	100W max, Non-LPS with a wider output adjustable range	In stock

# HDR-100 series

### SPECIFICATION

NOTE	<ol> <li>All paramete</li> <li>Ripple &amp; nois</li> <li>Tolerance :</li> <li>Constant curr fault condition</li> <li>Harmonic curi</li> <li>The power s directives. Fo</li> </ol>	All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1µf & 47µf parallel capacitor. Folerance : includes set up tolerance, line regulation and load regulation. Constant current limiting operation within 50% ~100% rated output voltage; protection type for short ciruit is hiccup mode, it will recover automatically after ault condition is removed. Iarmonic current test at 90% load for HDR-100-xxN. The power supply is considered as an independent unit, but the final equipment still need to re-confirm that the whole system complies with the EMC irectives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies."
